Summary

Software Engineer and React Native Developer with commercial experience delivering a live-commerce mobile application for an international client. Integrated a payment gateway (EPAY), built real-time streaming and chat features, and improved performance through API optimisation and caching. Skilled in React, React Native, TypeScript, JavaScript, Node.js, SQL, REST APIs, Git and GitHub, with daily use of AI coding assistants for rapid prototyping. MSc Advanced Software Engineering student at the University of Leicester.

Skills

Programming Languages: JavaScript, TypeScript, Java, Python, SQL, C++
Front-End and Mobile: React, React Native, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design
Back-End and APIs: Node.js, REST API, Payment Gateway Integration, WebSocket, Real-Time Streaming
Databases: MySQL, Microsoft SQL Server, Oracle, PostgreSQL (basic)
Tools and Practices: Git, GitHub, Version Control, Pull Requests, Code Review, Agile, Scrum, Unit Testing, Vite, Vercel, Firebase, AWS, Linux, DataGrip, Jupyter
AI Tools: GitHub Copilot, Claude Code, Cursor, AI-Assisted Development, Prompt Engineering, Rapid Prototyping

Experience

React Native Developer, SoftSale May 2025 – August 2026
Astana, Kazakhstan (Remote)

- Develop the live-commerce marketplace mobile application FBSM Live for Fashion Brand Square, a South Korean retail holding, using React Native and TypeScript in an Agile team.
- Integrated the EPAY payment gateway, enabling secure online transactions for 5,000+ active users.
- Built real-time live streaming and chat features, increasing user engagement during sales events by 30%.
- Optimised REST API requests and implemented caching, reducing average screen load time by 20%.
- Collaborate through GitHub using feature branches, pull requests and code review.

Project Manager, ADAM MEDIA January 2025 – March 2025
Astana, Kazakhstan

- Organised MAMAN FEST 2025, a national exhibition and job fair attended by the President of Kazakhstan, engaging 130+ partner companies.
- Planned and coordinated hackathons for students and early-career professionals on behalf of the company.

Project Manager, TrainAut June 2021 – February 2022
Astana, Kazakhstan

- Led development and testing of a mobile application for parents of children with autism, from requirements to release.
- Designed the user interface, integrated third-party SDKs and maintained the product roadmap.
- Managed digital marketing campaigns (email, Facebook Ads, Google Ads) to increase app visibility.

Volunteer Coordinator, Business Training Bolashaq June 2022 – August 2022
Astana, Kazakhstan

- Coordinated volunteers and event logistics; helped develop training materials for workshops and seminars.

Education

MSc Advanced Software Engineering, University of Leicester September 2026 – September 2027
Leicester, United Kingdom

BSc Software Engineering, Astana IT University September 2022 – June 2025
Astana, Kazakhstan

Certifications

- EPAM Front-End Developer Certificate, EPAM Kazakhstan, 2024
- AWS Academy Graduate: Cloud Foundations, Amazon Web Services, 2024
- Cisco Networking Essentials and Cisco Linux Essentials, Cisco Networking Academy, 2023

Additional

Languages: English (professional), Russian (native), Kazakh (native)
Activities: Markethon 5.0 and Blockchain Hackathon participant, Astana; Work and Travel Program, New York, USA
